Professional Summary

Aspiring Machine Learning and Data Analyst professional with a background in Computer Science Engineering. Skilled in Python, data analysis, and building machine learning models. Experienced in developing real-world projects including NLP-based classification systems, full-stack applications, and cloud-based solutions.

Education

B.Tech – Computer Science Engineering, KLU University (2019–2023) | CGPA: 7.36/10

Master's in Computer Science, OTH Amberg-Weiden, Germany (2024–2025)

Certifications

[AWS Solutions Architect – Associate](#)

[AWS Academy Graduate – Cloud Foundations](#)

[Aviatrix ACE Certification](#)

Business English Certificate – Cambridge Certification

Wipro Talent Next Program - Digital skill readiness program course completion certificate

Technical Skills

Programming: Python, Java

Libraries/Frameworks: Scikit-learn, Pandas, NumPy

Web Technologies: Angular

Tools: Git, GitHub, Streamlit

Cloud: AWS (ElastiCache, Redis)

Concepts: Machine Learning, NLP, Data Visualization

Projects

- Movie Recommendation System (Deployed)
 - Built and deployed a content-based movie recommendation system using Python and scikit-learn, leveraging cosine similarity on textual features to suggest similar movies.
- Spam Email Classifier | Python, Scikit-learn, NLP, Streamlit
 - Developed an NLP-based spam detection model using TF-IDF and Naive Bayes achieving 97% accuracy.
 - Performed data preprocessing including handling missing values and text vectorization.
 - Evaluated model performance using confusion matrix and classification report.
 - Compared Naive Bayes with Logistic Regression.
- Stock Exchange Management System | Python, Angular
 - Developed a web-based system to manage and track stock transactions.
 - Implemented backend logic using Python and interactive frontend using Angular.
 - Enabled features like stock updates, transaction tracking, and user interaction.
- Australian Environment Analysis | Data Visualization
 - Conducted exploratory data analysis on environmental datasets.
 - Created visualizations to identify trends and patterns.
 - Provided insights using data-driven techniques.
- Online Voting System | Java
 - Developed an application for casting and counting votes.
 - Ensured accuracy and integrity in vote counting.
 - Designed a simple user interface.
- Fast Session Store using Amazon ElastiCache (Redis) | AWS
 - Built a session caching system using AWS ElastiCache (Redis).
 - Improved application performance through fast data retrieval.
 - Demonstrated understanding of cloud-based caching systems.
